My Response:

I am aiming to be an aggressive and smart rider, which wants to be the most successful rider among professionals.

Briefly about me

I have been cycling since I was thirteen years old, when my father showed me a world of cycling. He was also successful rider for long time. I was getting better and better at cycling from my sixteen. My increase is more than less slow, but very sure. I have been training with some better riders than I was, for example David Kášek, Martin Bína, Martin Zlámálík, Zdeněk Štybar, Roman Kreuziger and many more. Some of them finished with cycling, but some of them go on, as I do. Thanks to my sedulity I am at least on the same or better level as are some of them.

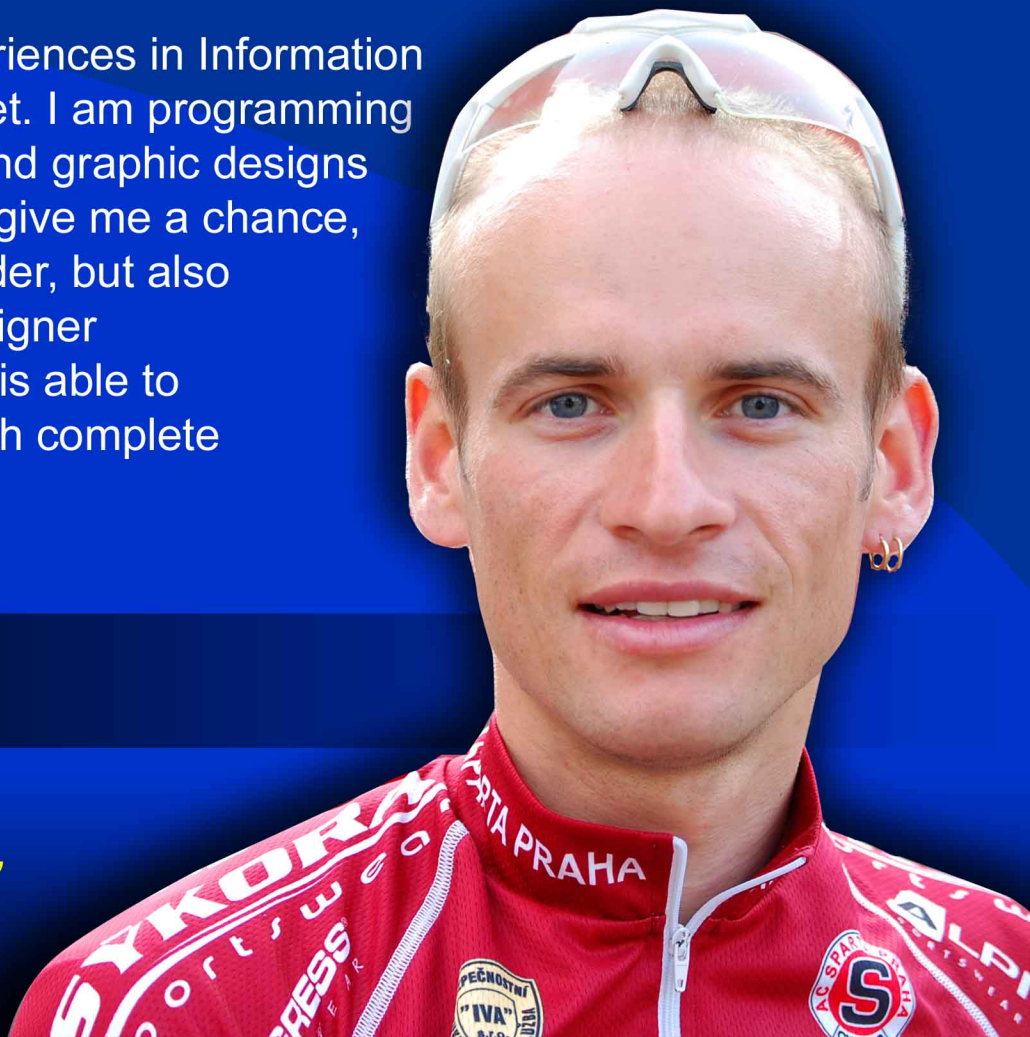

My cycling experiences are not only in racing, I also cooperate with our family company MiRaSport – sell and service bicycles and bike stuff, import Italian bikes of many marks.

It is a big experience to trade with Italian market. Since I was a rider in Mercedes Benz – Selle Italia in 2003, I helped to start cooperation between our company and Italian market. Cooperation which was bought by hard work and which We greatly appreciate.

I have also a lot of experiences in Information technologies and Internet. I am programming Internet presentations and graphic designs in my spare time. If you give me a chance, you will get not only a rider, but also a very good graphic designer and programmer, which is able to significantly help you with complete image of your team.
